A Systematic Computational Screening for Conserved Protein Domain-Associated Structured RNAs

Daniel Dachs

BIOC 490

Supervisor: Ass. Prof. Paul Gardner

Department of Biochemistry

University of Otago

1 Introduction

This introduction provides the background and rationale for [brief description]. The proposed project aims to [state what you are going to do].

According to Smith and Jones (2020), this phenomenon has been well documented. Studies have shown multiple trends (Smith and Jones, 2020).

1.1 [Relevant subtopic 1]

1.2 Project Aims

The main aims of this project are:

1. **Aim 1:** [Description]
2. **Aim 2:** [Description]
